Summary

Django developer experienced in utilizing python tools for server-side development. fluid understanding of other languages such as C#, JavaScript, HTML. Worked on several personal projects including an online marketplace with third-party APIs(Google Maps and PayPal) implemented, a Netflix clone, Rest APIs with Django, etc; Versatile, I possess a good understanding of different technical stages of creating a site or a web application; from capturing the user needs, to the frontend and backend development using technologies like React/Next, NodeJS, and Django (which I specialize in). I also take part in forming the younger generation by teaching python programming language and its uses in Machine learning to college and high school students in one of the best STEM colleges in the region.

Experience

ENGLISH WORLD | Naberejnye Chelny, Tatarstan
